About Me

Adaptive and detail-oriented Frontend Developer specializing in building high-performance user interfaces with a strong emphasis on code quality, UI consistency, and optimal client-side performance. Proficient in translating product requirements and design specifications into scalable, reusable components with efficient rendering and robust state management.

Experienced in architecting frontend applications at scale, managing complex data flows, optimizing render performance, and integrating RESTful APIs. Committed to writing clean, modular code that enhances team collaboration and long-term maintainability.

Skilled at working cross-functionally with backend engineers and product teams to deliver features that meet business objectives while maintaining exceptional user experience and technical excellence.

Experiences

Frontend Developer

PT. Herca Cipta Dermal Perdana

Mar 2025 - Present • 1yr 3mos

Developed and maintained internal mobile and web applications with primary focus on frontend development. Managed multiple projects across diverse technology stacks, from legacy systems using Yii2, Bootstrap, and jQuery to modern architectures with React, Next.js, and Tailwind CSS.

Implemented new features, performed bug fixes, conducted incremental refactoring, and optimized performance and user experience across different systems. Integrated RESTful APIs, managed dynamic data flows, and structured component architecture to ensure modularity, reusability, and maintainability despite varying codebases and technologies.

Collaborated with development team using Git for version control, branch management, code reviews, and conflict resolution. Managed tasks through official ticketing system for priority alignment and progress tracking, alongside Trello for personal task management and daily work monitoring. Thrived in a fast-paced environment with tight deadlines and shifting priorities while consistently maintaining code quality and application stability.

- React
- React Native
- Tailwind CSS
- Next JS
- jQuery
- Git
- MySQL
- Javascript
- Bootstrap
- Yii2

Frontend Developer

PT. Kodingkeun Digital Solution

Jul 2022 - Jan 2025 • 2yrs 7mos

Developed web and mobile applications with primary focus on frontend development. Built responsive and interactive user interfaces using HTML, CSS, JavaScript, and modern frameworks including React, Vue.js, Next.js, and Nuxt.js. Leveraged Tailwind CSS and Bootstrap to accelerate development with consistent, maintainable components.

Integrated RESTful APIs for dynamic data management and optimized application performance to maintain efficiency during complex state management and user interactions. Designed modular and reusable component architecture to support scalability and long-term development sustainability.

Contributed to backend development using PHP (Laravel) and MySQL to build and customize API endpoints, implement data validation, and develop business logic aligned with application requirements. Managed version control using Git for team collaboration, branch management, and code reviews.

- Laravel
- Next JS
- Nuxt JS
- MySQL
- React
- Vue
- Bootstrap

Junior Programmer - PKL

PT. CIGS Indonesia Digital

Jul 2021 - Oct 2021 • 4mos

Contributed to the development of a Laravel-based e-voting application as a Full-Stack Developer with primary focus on frontend development. Built responsive user interfaces using HTML, CSS, and JavaScript with well-organized code structure and consistent components across devices.

Integrated frontend with backend through PHP (Laravel) and managed MySQL database for CRUD operations, data validation, and e-voting application flow. Implemented key features including voting mechanism, user authentication, and results dashboard to ensure data accuracy and electoral integrity.

Collaborated effectively using Git workflow (branching, structured commits, pull requests, and conflict resolution) for team coordination and codebase stability. Performed debugging, feature testing, and bug fixing to ensure stable and accurate system performance.

Supported cross-functional task completion based on team needs to meet development targets within the internship timeline.
